

# SMOG CHECK CHECKLIST

Everything You Need for a Smooth Visit to Smog Busters

---

## WHAT TO BRING

- Your vehicle (obviously!)
- Registration renewal notice (helpful but not required – we can look you up by VIN)
- Payment (we accept cash, cards, and tap-to-pay)

## IMPORTANT REMINDERS BEFORE YOUR VISIT

- No recent battery work or replacements – If your battery was disconnected or replaced, wait at least one week before testing (for 1996+ vehicles). The computer system needs time to reset.
- No recent mechanical repairs – If you've had work done on your vehicle, wait a week to allow the diagnostic system to complete its self-checks.
- For 1995 and older vehicles – Come after running errands. A warm engine gives the best results.
- Check engine light off – If your check engine light is on, get it checked before testing. You can still test with it on, but failure is the first step toward a waiver if repairs are costly.

## GOOD TO KNOW

- No VIN? No problem! If you forget your registration renewal notice, we can find your information using your vehicle's VIN. We just need to match at least two identifiers.
- Complete your registration renewal here! After your smog check, you can process your vehicle registration renewal right at Smog Busters. We're authorized by the state of Nevada. It takes just 1-2 extra minutes. One-stop shop!
- Heavy duty vehicles welcome! All 30+ Smog Busters locations handle heavy-duty vehicle testing. (Diesel testing available at our corporate office: 2711 E. Sahara Ave., Las Vegas, NV 89104)
- Our technicians are 1G-rated – This means we are legally authorized to test your vehicle for registration purposes only. We cannot diagnose issues, pre-test, or advise on repairs. The emissions analyzer determines pass/fail, not us.

## OUR HOURS

- Monday - Friday: 8:00 AM - 6:00 PM
- Saturday: 8:00 AM - 4:00 PM
